

SATHYABAMA UNIVERSITY

CENTRE FOR CLIMATE CHANGE STUDIES

Invitation for Summer Training Research Project

Centre for Climate Change Studies (CCCS), Sathyabama University is inviting application for summer training research project between April - June 2017. During this period, the students will be introduced to independent research projects under the concerned Principal Investigators, where they will get training on how to perform literature survey, design hypothesis and work plan, do interpretation and data analysis. Students will be encouraged to perform independent project, and learn basic techniques.

About the centre

The CCCS located in the International Research Centre at Sathyabama University, has been established in the year 2011 with the primary mandate of investigating the impact of climate change on marine organisms associated with various ecosystems like coral reefs, macrophytes meadows, Intertidal zones, Mangrove ecosystem etc. We have established indoor mesocosm set up for microalgae and shrimp demonstration hatchery to perform multifactorial stress experiments. For further details please visit <http://www.centreforclimatechangestudies.com/>

Who can apply

M.Sc /M.Tech students and research scholars in the area of life sciences with a strong interest in the field of marine ecology and climate change are eligible to apply.

Registration fee

5000/- per month (cover the costs of chemicals and consumables). Students are encouraged to arrange their own accommodation and travel. CCCS can accommodate maximum of 6 students based on the candidate's interest and merit.

How to apply

Interested candidate can apply by sending their CV along with letter of Interest (LOI) to Dr. Vinitha Ebenezer through email.
